

HOSPITAL DISTRICT VALUES

Respecting the patient/customer, skilled and effective care and good service

Caring for personnel

GENERAL INFORMATION

Working in cooperation with health services and social services, the Satakunta Hospital District offers specialized medical care services for the 231 000 residents of its 23 member municipalities. The largest owner-municipality in terms of number of residents is the city of Pori (approx. 82 787 residents) and the smallest is Siikainen (approx. 1 677 residents).

The hospitals are located in Pori, Rauma and Harjavalta. Psychiatric services are available in the hospital municipalities and also in Kankaanpää, Eura and Huittinen. Approximately 590 beds are in use. Social services include the Antinkartano Mansion Training Centre in Ulvila. Work training centres are located in Eura, Harjavalta, Huittinen, Kankaanpää and Ulvila.

Exceptionally demanding specialized care services are purchased, most commonly from TYKS, HUS, and Orton.

SERVICES AND FINANCE

Hospital district services for its member municipalities and other quarters are financed by charges for services (approx. 90 % of income). Income from customer payments will decrease in connection with the planned decrease in bed unit care (- 3,4 %).

Other sources of income are different types of compensation fees, the sale of other services, contributions and funds from different projects.

Other special payments are billed separately from the municipalities. In 2008 they were 12,90 euros/resident. Exceptionally demanding specialized-level care services are “billed through” from the member municipalities.

FIGURES M€/NUMBERS

	Budget realization 2007	Budget realization 2008	Budget Realization 2009
Operational income , of which	210,08	224,54	266,70
